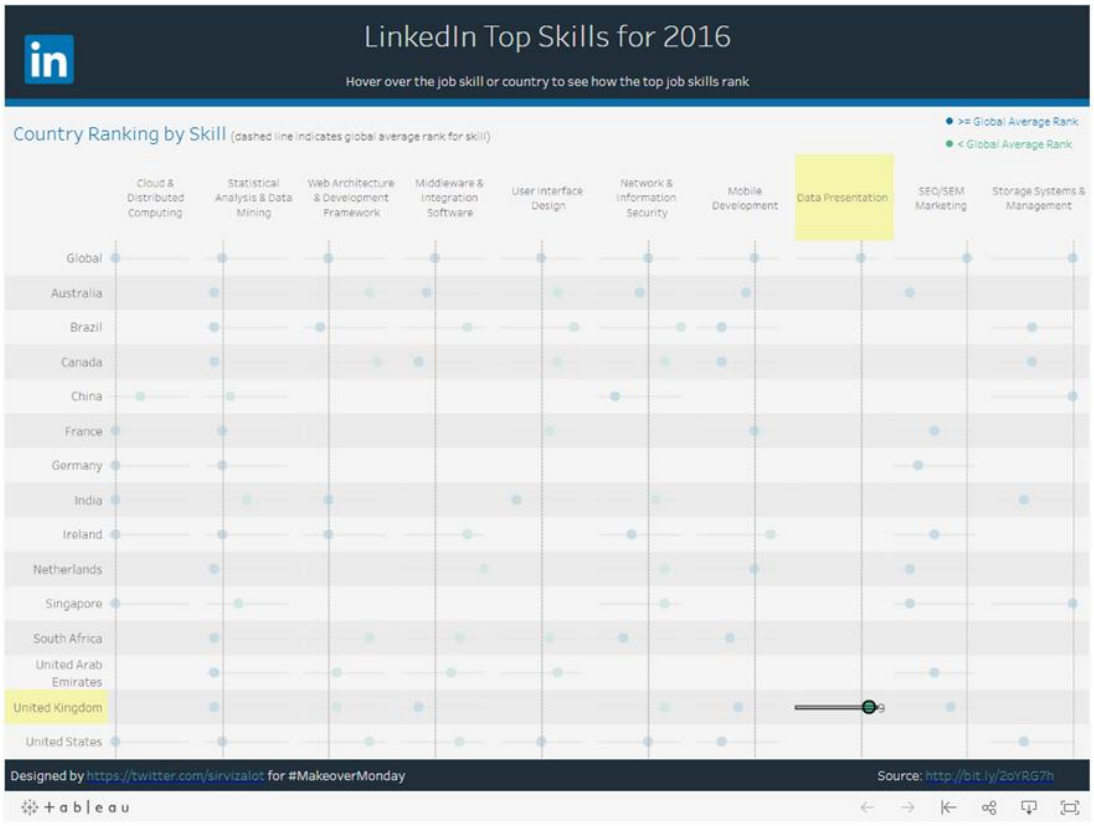
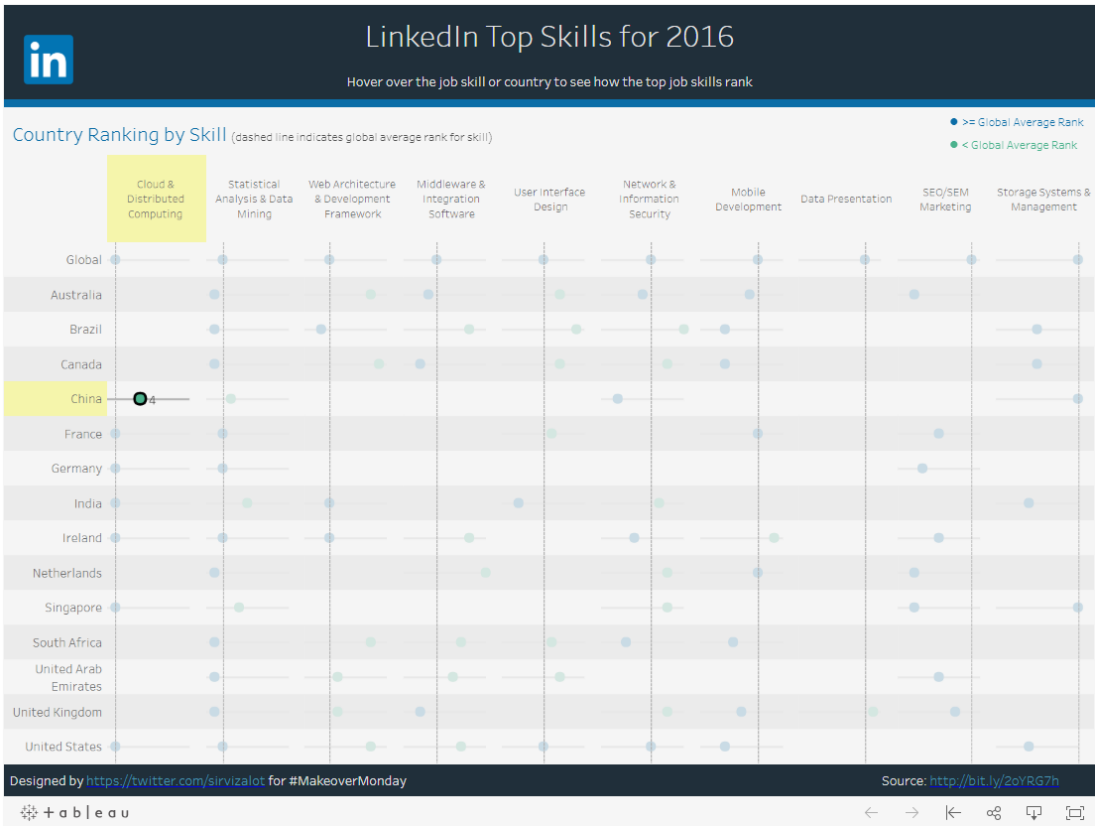
Udacity Data Foundations Nanodegree

Project: Insights from Data



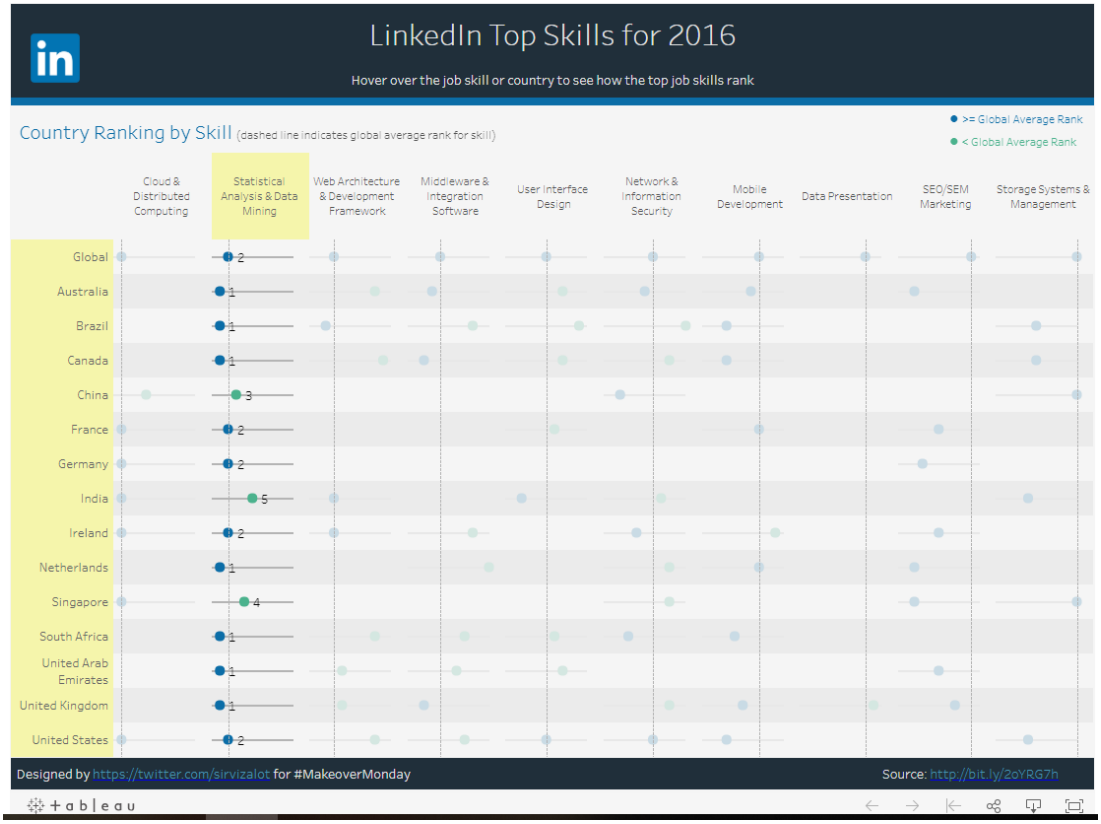
What's the insight here?

From this screenshot, we can assume that Data Presentation skills are only on demand, in United Kingdom. Also, it can be extracted that this skill category is not on demand or there's no data provided, for the rest of countries.



What's the insight here?

Another insight that can be extracted from this dashboard is the fact that China is the only country that's below average in terms of Cloud & Distributed skills demand.



What's the insight here?

Finally, we can notice in this screenshot, that Analysis & Data Mining is the only skill category that is on demand in all the countries or there's data provided for all the countries.
